

WEEK No. 1

Duration of Week: from 1/1/26 to 3/1/26

Expected work /task / Activities:

Discussion with guide and searched different technologies to be learn.

Day	Date	Activities Carried out
01	1/1/26	-Discuss about what to learn ahead and set internship project goal.
02	2/1/26	-Started learning Latex > learned basic of latex > Basic syntax of latex
03	3/1/26	-Started creating simple latex document using overleaf Ex. own Resume.
04		
05		
06		

Summary: Discussed about different technologies to be learned with guide and team members
started learning latex.

WEEK No. 2

Duration of Week: from 5/1/26 to 10/1/26

Expected work /task / Activities:

Choose the technologies to learn according to personal skillset and interest. search & join online courses.

Day	Date	Activities Carried out
01	5/1/26	- started searching for problem statement for project. - search for technology courses online
02	6/1/26	- Selected online python course - Discuss IOT based project ideas - continue searching problem statement
03	7/1/26	- Started learning python course - Discuss about creating road damaged image dataset with guide.
04	8/1/26	- started finding requirement for creating dataset - continued learning python
05	9/1/26	- Analyze different datasets present on kaggle - Understand how to create dataset
06	10/1/26	- Discuss and searched courses on swayam portal - started linear algebra courses.

Summary: Started learning python course online and understand to create dataset.
also searched different courses on swayam portal

WEEK No. 3

Duration of Week: from 12/1/26 to 17/1/26

Expected work / task / Activities:

Started to click road pictures and continued learning and courses.

Day	Date	Activities Carried out
01	12/1/26	- Started to click road pictures. - Started AWS and DSA course.
02	13/1/26	- Discussed & searched courses on swayam portal - created separate ITR email & Drive
03	14/1/26	- Registered Entrepreneurship course also ML & Research methodology courses on swayam.
04	15/1/26	- Started uploading and sorting the different types of road damage image in dm - Discuss patent style problem statement.
05	16/1/26	- Learning continued of Linear Algebra & DSA course. - continued learning ML course.
06	17/1/26	- continued collecting images required for dataset. - continued learning ML, Algebra & DSA course.

Summary: Uploaded road damage images in drive and continued learning different courses. collected huge amount of images required for dataset.

WEEK No. 4

Duration of Week: from 19/1/26 to 26/1/26

Expected work /task / Activities:

To Start developing code for road damage image dataset. Finalize problem statement for project.

Day	Date	Activities Carried out
01	19/1/26	- Finalized "Student Evaluation System" project. - Discuss on how to clean the dataset - Made resume by using latex.
02	20/1/26	- Uploaded all types of road damage dataset images on drive. - Sorted all images according to there types.
03	21/1/26	- Discussed different ideas of project related AI & ML - Set dimension for all images in dataset
04	22/1/26	- Rename all images of dataset with there type and image number - Organized images in proper format.
05	23/1/26	- Clean all the dataset images by removing blur images, shadow images etc. - checking accuracy of dataset by running Python Script.
06	24/1/26	- Started developing code for road damage image dataset. - Searched how efficiently the dataset can be represented.

Summary: Finalized problem statement for project.
clean sort and Rename dataset images.
Started developing dataset code.

WEEK No. 5

Duration of Week: from 27/1/26 to 31/1/26

Expected work / task / Activities:

Developing UI for dataset & checking it's
quality & accuracy.

Day	Date	Activities Carried out
01	27/1/26	- Searched best UI for dataset. - completed sorting & organized good damage images.
02	28/1/26	- Dev started developing UI for Real damage image dataset, so that dataset will look interactive & clean.
03	29/1/26	- continued developing UI - cross checked images with their names & types
04	30/1/26	- completed UI development for dataset. - Discussed about features of Student evaluation system.
05	31/1/26	- Discussed about practical Assessment project. - confirmed features of student evaluation system project.
06		

Summary: Discussed about practical assessment
system project. Completed UI design for
database project.

WEEK No. 6

Duration of Week: from 2/2/26 to 7/2/26

Expected work /task / Activities:

To register for Aptitude competition, Test dataset & planning to develop practical Assessment system.

Day	Date	Activities Carried out
01	2/2/26	- Testing accuracy of Road damage image dataset. - Testing quality of Road damage image dataset.
02	3/2/26	- continued testing accuracy & quality of dataset. - Decided features & modules for PA system.
03	4/2/26	- continued testing accuracy & quality of Dataset. - searched best UI for PA system.
04	5/2/26	- started developing Practical Assessment system. - continued learning swayam courses.
05	6/2/26	- Created Login for Student & Teacher in PA system & continued further development. - continued learning courses.
06	7/2/26	- Created Home pages separate for student & Faculty. - continued learning swayam courses.

Summary: Completed testing of Road damage image dataset. Started developing practical Assessment system. continued learning Registered courses.

WEEK No. 7

Duration of Week: from 9/12/26 to 14/12/26

Expected work /task / Activities:

To Adding different functions for student & Faculty login.

Day	Date	Activities Carried out
01	9/12/26	- Created function to create student profile - Developed student homepage and added instructions to it.
02	10/12/26	- Added subjects in student login with their practical list.
03	11/12/26	- Created 50 questions for each practical - Developed the function to shuffle the question within students.
04	12/12/26	- Registered for National level Article competition. - Added all the questions in each practical along with options.
05	13/12/26	- Developed functions to calculate student average and displayed student score for each practical
06	14/12/26	- Created Module for online Attendance of students. - Added ('About us') function for students

Summary: Developed all the modules for students in students practical Assessment system.

WEEK No. 8

Duration of Week: from 16/2/26 to 21/2/26
Expected work /task / Activities:

Developing all functions and modules for faculty side in student practical Assessment system.

Day	Date	Activities Carried out
01	16/2/26	- Created Home page for faculty side - Added profile function to create faculty profile.
02	17/2/26	- created function to display all student scores along with there name batch & average to faculty.
03	18/2/26	- created function so faculty can add or remove subject and add or remove practicals.
04	19/2/26	- Developed online attendance module to take attendance for each practical.
05	20/2/26	- Added function to convert attendance in Excel sheet & can be download - Displayed ("About us") module in faculty side login
06	21/2/26	- Adding Rules & Instructions on faculty side. - checking completly developed modules

Summary: Developed faculty related functions or modules in practical assesment system.
completed Development of practical assesment system project.

WEEK No. 9

Duration of Week: from 23/2/26 to 28/2/26

Expected work / task / Activities:

To complete Testing of practical Assessment system. Write article for National level Article competition.

Day	Date	Activities Carried out
01	23/2/26	- Started searching topic for practical assessment system. - searched & analyzed different article for inspiration,
02	24/2/26	- Divided into 2 Groups and selected 'PCOS' topic for article writing. - Started searching about 'PCOS' disease
03	25/2/26	- Searched about medicinal plants that cure particular disease for article - Gathered information related 'PCOS',
04	26/2/26	- Decided to develop Student Evaluation system as final project. - started writing article base on information we searched.
05	27/2/26	- Wrote complete article on 'PCOS' & Named 'Management of Polycystic ovary Syndrome (PCOS) through Ayurvedic Herbs'.
06	28/2/26	- Attended meeting with Principal sir & Guide to discuss about Student Evaluation system "project".

Summary: Decided article topic, searched information regarding it & wrote article.
Tested PA system also attended meeting with guide & principal sir,

WEEK No. 10

Duration of Week: from 21/3/26 to 7/4/26

Expected work / task / Activities:

To Decide modules & functions for Student Evaluation system, technology Stack & upload article for competition.

Day	Date	Activities Carried out
01	21/3/26	- Decided all modules & functions for Student Evaluation system. - Listed all modules named them & planned to develop development.
02	31/3/26	- Searched for different technologies and finalized MERN technology Stack to develop project.
03	4/3/26	- Watched short courses for MongoDB & React. - Uploaded articles on website.
04	5/3/26	- Created setup to develop project. - Installed Node.js, Express.js & MongoDB.
05	6/3/26	- Searched best UI design for home page & faculty login.
06	7/3/26	- Searched best UI design for Student login & home page. - Created ER diagram for project.

Summary: Finalized all modules of project & decided complete project plan.
Completed setup required for project.
